BROW EXTENSION Post Care Instructions

As we all know how we care for our brow extensions makes all the difference.

Here are a few suggested post-care tips!

The “WHY” is so important, so I have included it with each tip to help you better understand the importance.

- Avoid lotions/creams on the brow area. It gives an oil coating on the hairs and lessens the retention of your brow extensions.
- Avoid oil-based makeup removers on your brows. It gives an oil coating on the hairs and lessens the retention.
- Cleanse the brows daily. The cleaner the hair, the better the retention and the healthier the hair will be.
- Brush your brows gently to put them into place as aggressiveness can pull on your natural hair.
- No picking or pulling on your brows. It prevents you from pulling out your natural brow hairs.
- Sleeping on your back is recommended. Face sleepers will have retention issues.
- Avoid facial products on your brows. Exfoliants and masks can be too aggressive on the brow ext.

Thank You
